How to Fold an Origami Fish

origami-resource-center.com

- 1. Take a square sheet of paper and pre-crease it as shown.
- 2. Collapse the paper into a classic windmill.
- 3. Arrange the flaps: fold the bottom-left flap down and fold the the bottom-right flap to the right.
- 4. Prepare the tail: fold the bottom-right flap up...
- 5. ...then fold the tip down.
- 6. Repeat with upper half of the tail: fold the top-right flap down...
- 7. ...then fold the tip back up again. This completes the tail.
- 8. Prepare the fins: fold the top and bottom flaps towards the center. Leave a small space which will be the mouth of the fish.
- 9. Turn over. Origami fish is done!
